Word from the president

We want to make a difference. Because of this simple sentence, our Foundation set itself an objective, which is to help kids by supporting them with concrete gestures. With the Montreal Impact's collaboration, we are looking to give back to the community, but also offer our youth a framework to better their quality of life. Moreover, in 2017, we began a project to develop and build multisport mini-fields in Montreal neighbourhoods and across Quebec where they are needed most. Our goal remains the same: to allow our kids to flourish, to fulfill their potential – and to succeed!

Our mission

Organize and support various activities and projects to help improve the quality of life of underprivileged children and their families.
